Introduction:

My name is Jeroen van Eck. I'm a professional mountainbiker who's focussing on the <u>E-MTB</u> and Cross Country <u>Eliminator</u> disciplines. Two very interesting formats in terms of (sales) potential, exposure and action.

I belong to the best of the world in the fast and explosive Eliminator discipline with winning twice the UCI World Cup Overall and several international titles. I was one of the first riders that committed to the upcoming E-MTB discipline and did win a UCI World Cup E-MTB in 2021.

In the coming years I will focus more on the various E-MTB disciplines since this will be the future of cycling. Not only sales wise there are a lot of opportunities but also race wise the discipline has a lot to offer.

| Information: | Sportive results: | Social media: |
|--|--|---|
| Disciplines: E-MTB & XCE Birth: 14-05-1993 City: Malden (NED) Study: Bachelor industrial engineering & management email: jeroen@vaneckracing.nl | Eliminator: UCI 2x World Cup Overall winner (2018/2021) UCI Silver World Championships (2021) 2x European Champion (2015/2021) Multiple Dutch Champion (4 times) E-MTB: UCI World Cup winner Girona 2021 UCI 4th World Cup overall 2021 UCI 7th World Championships 2020 1x Dutch Champion (2019) | Instagram: 6.200 followers Youtube: 5.370 subscribers Facebook: 2.370 followers <u>Strava</u> : 1460 followers <u>Website</u> : 75 viewers per week |

My approach:

"Determined to go for the best with a professional approach. This by working process-orientated with an eye for detail and the aim for quality."

I'm always looking for new chances and opportunities to improve myself, something that brings me to a higher sportive level. I'm a pioneer and not shy of trying new things and disciplines, my creativity and 'out of the box' thinking comes in handy for that.

My vision: The E-MTB market will be the focus market for the coming years, and so E-MTB racing will become more and more important.

The coming years I will commit to the E-MTB disciplines with participating in the racing and adventurous formats. Riding an E-MTB can be technical and physically challenging. You can ride trails/obstacles you were not able to ride before and explore places you couldn't go to with a normal bike.

The use of social media and creating content will be a very important tool and focus area to inspire and convince the consumer that riding an E-MTB can be fun, physical and adventurous.
